Egyptian single exempt osama abdelazim

SUMMERY

Senior Information Security Engineer with 4+ years spanning security operations and compliance. Leads detection, triage, and incident response across multi-tenant environments using SIEM and EDR platforms (Elastic,CrowdStrike,etc), and supports ISO 27001 and PCI DSS audit cycles including gap analysis and corrective actions. Certified threat hunter with a track record of improving detection coverage and reducing response times.

PROFESSIONAL EXPERIENCE

Present

Global Brand (Depi Scholarship)
Instructor (Freelance)

03/2025 – present
Giza, Egypt

Raya Data Center
Senior Information Security Engineer

- **Monitoring and Response:** Continuously monitor security alerts from various sources (e.g., SIEM, IDS/IPS) to detect and assess potential threats.
- **Incident Management:** Analyze and triage security incidents to determine their severity and impact, and investigate and contain incidents while documenting findings and actions taken.
- **Threat Intelligence:** Collect and analyze threat intelligence to stay ahead of potential threats and enhance defensive measures.
- **Tool Management:** Ensure all security tools are up-to-date and properly configured to maintain optimal performance.
- **Compliance with Standards:** Implement and maintain compliance with ISO standards to ensure robust cybersecurity and business continuity.
- **Policy and Compliance Review:** Regularly review and ensure alignment with organizational policies and regulatory requirements to maintain compliance and mitigate risks.
- **Documentation:** Maintain detailed documentation of incidents, investigations, audits, and response actions.
- **Audit Support:** Assist with audits and compliance assessments as needed, and address audit findings by implementing corrective actions.
- **Security Awareness and Training:** Develop and deliver security awareness training programs to enhance employee understanding of cybersecurity best practices.
- **Technology Implementation:** Support, evaluate, and implement security technologies and solutions to strengthen the organization’s security posture.

- **Continuous Improvement:** Stay updated on the latest security trends, threats, and technologies to continuously improve security operations.

Cairo, Egypt

Xceed
Technical Support Specialist
-Responsibilities
Dealing with customer to solve and handle their technical problems that they're facing
working in a team and helping them with any questions

05/2022 – 10/2022
cairo, Egypt

Amit learning
SOC Analyst (trainee)

🎓 EDUCATION

06/2017 – 06/2022
Gamasa, Egypt

BSc / telecom engineering
delta university

CERTIFICATES AND BADGES

- Certified Threat Hunting Professional - INE
- Cisco Certified Network Associate Security (CCNA) - Cisco
- cyber security engineer (SOC track) - AMIT Learning
- Fundamentals of Dark Web Monitoring (SOC Radar)
- First Blood - LetsDefend
- ITIL® Foundation
- (Security+) - CompTIA
- Cybersecurity Essentials - Cisco
- Pre Security Learning Path - TryHackMe
- Introduction to network security - MaharaTech - ITIMooca
- Incident Handler - LetsDefend
- Introduction to Cybersecurity - Cisco
- Security Operation Center - CyberTalents
- ITIL® Foundation - ITEgypt Corp
- Elastic Security Fundamentals: SIEM - Elastic
- CyberTalents Certified Threat Hunter

SKILLS AND SOLUTIONS

- Firewall Administration (Fortinet)
- VMware solution monitoring (vSphere-Log insight)
- Strategic and creative task management
- Auditing and gap analysis
- Penetration Testing
- AI solutions
- EDR Administration (Falcon CrowdStrike)
- Vulnerability assessment (Nessus)
- Security Operations Center
- Problem Solving
- Investigation
- Automation & scripting
- Payment Card Industry Data Security Standard (PCI DSS)
- Innovative learning methods
- SIEM solutions
- open source intelligence analyst
- Leadership and Mentorship
